

Chapter

Mineral Resources

1. Bauxite is the ore of : MAIN 2024

- (a) Aluminium
- (b) Copper
- (c) Manganese
- (d) Iron

2. Copper is alloyed with Zinc to form : MAIN 2023

- (a) Stainless steel
- (b) Brass
- (c) Bronze
- (d) Aluminium

3. ____ Mineral is used to regulate blood sugar levels and to support the immune system. MAIN 2022

- (a) Manganese
- (b) Iron ore
- (c) Mica
- (d) Copper

4. Name any three varieties of coal produced in India. MAIN 2024

5. Name the variety of coal widely used in Iron and Steel Industries of India. COMP 2024

6. Name the state that is the largest producer of iron ore in India. SQP 2024

7. Name any one mining area of Iron ore from the state mentioned by you. MAIN 2024

8. Name the state of India that leads in the production of Manganese. COMP 2023

9. Name two states where coal is mined in abundance. MAIN 2023

10. What is the importance of Manganese for the Iron and Steel industry ?
SQP 2023

11. What is the difference between Metallic and Non-metallic minerals ?
COMP 2023

12. What is a mineral ? State two characteristics of minerals. SQP 2021

13. A mineral X is used for making iron and steel. It increases the strength of steel. Identify the mineral. Which country of South Asia is the leading producer of that mineral ?
COMP 2022

Solution

1. Thus, the correct option is **(a) Aluminium**.
2. Thus, the correct option is **(b) Brass**.
3. Thus, the correct option is **(a) Manganese..**
4. Three varieties of coal produced in India are: **Anthracite, Bituminous, Lignite**.
5. The variety of coal widely used in the Iron and Steel Industries of India is **Bituminous coal**.
6. The largest producer of iron ore in India is **Odisha**.
7. One mining area of iron ore in Odisha is **Keonjhar district**.
8. **Odisha**.
9. **Jharkhand, Chhattisgarh**.
10. **Manganese** is crucial for steelmaking as it improves strength, removes impurities and enhances durability.

11.

Aspect	Metallic Minerals	Non-metallic Minerals
Composition	Contain metals in their raw form	Do not contain metals
Examples	Iron, Copper, Gold	Limestone, Mica, Coal
Appearance	Shiny with metallic luster	Dull, non-metallic appearance
Conductivity	Good conductors of heat and electricity	Poor conductors of heat and electricity
Extraction	Extracted for industrial metal use	Used in industries like construction and energy
Uses	For metals, tools, machinery and electronics	For building materials, energy and manufacturing

12. Mineral:

Minerals are naturally occurring substances of either organic or inorganic origin, characterized by specific chemical and physical properties.

Two Characteristics of Minerals:

1. **Uneven Distribution:** Minerals are not uniformly spread across different geographical areas.
2. **Exhaustible Resources:** Minerals are finite and deplete over time; they cannot be quickly replenished.

13. Mineral X is manganese. India is the leading producer of manganese.
