

Chapter

Transport

1. Which of the following means of transport has best use during floods / earthquake? MAIN 2024

- (a) Airways
- (b) Railways
- (c) Roadways
- (d) Waterways

2. The port in Eastern India which has the problem of silting is____. SQP 2024

- (a) Chennai
- (b) Kolkata
- (c) Puri
- (d) Visakhapatnam

3. The deepest landlocked port is____. COMP 2022

- (a) Chennai
- (b) Kochi
- (c) Kandla
- (d) Visakhapatnam

4. The port on the east coast of India which exports iron ore and coal to Japan is____. MAIN 2023

- (a) Haldia
- (b) Chennai
- (c) Visakhapatnam
- (d) Paradip

5. Mention two advantages and one disadvantage of Inland water transport. MAIN 2024

6. Why has airway become more popular than other means of transport? (Any three reasons) MAIN 2024

7. Name a port on the east coast which is often hit by cyclones during the months of October and November. COMP 2021

8. Name the two major projects developed by NHAI. SQP 2022

9. Why is road transport an important means of transport in India? (Any two reasons) MAIN 2024

10. Give a reason for each of the following: MAIN 2024

(i) Northern plain is best suited for the development of Railways.

(ii) Railways are managed completely by the Central Government.

11. Name two situations where helicopter services may be used? MAIN 2024

12. Why is it important to have a well developed means of transport in India?
MAIN 2023

13. "Though an expensive mode of transport, Airways is gaining popularity in India." Explain giving two reasons. MAIN 2023

14. Why are South Indian rivers not ideal for inland water transport? MAIN 2023

15. Mention two advantages of waterways. MAIN 2023

16. Why are roadways considered more important than any other means of transport? SQP 2023

17. Mention two advantages of using railways as means of transport.
MAIN 2023

18. NSEW is helpful for India. Give reasons. MAIN 2022

19. Roadways are always considered more important than any other means of transportation. Give two reasons in support of the statement.
MAIN 2016,2019,2022

20. What is the name of the National Airlines of India? MAIN 2023

21. Give two advantages and one disadvantage of helicopter services over aeroplane services. MAIN 2021

22. List two advantages and one disadvantage of air transport in India. SQP 2022

23. What is the significance of an efficient transport system? COMP 2023

Solution

1. Thus (a) Airways is correct option.
2. Thus (b) Kolkata is correct option.
3. Thus (d) Visakhapatnam is correct option.
4. Thus (d) **Paradip** is the correct option.

5. Advantages of Inland Water Transport:

1. **Low Operating Cost:** It is one of the cheapest ways to transport heavy and bulky goods over long distances.
2. **Environmentally Friendly:** It produces very little pollution and has a low carbon footprint.

Disadvantage:

- **Slow Speed:** It is slower than roadways and railways, so it is not suitable for transporting perishable or time-sensitive goods.

6. Airways have become more popular due to the following reasons:

1. **Speed:**
Air travel is the fastest mode of transportation, suitable for long distances and urgent travel needs.
2. **Accessibility to remote areas:**
Airways can reach remote, hilly, desert, and island regions where roads and railways are not feasible.
3. **Comfort and convenience:**
Air travel offers high comfort, safety, and reduced travel time, making it the preferred choice for long-distance passengers.

7. Chennai

8. The two major projects developed by NHAI are:

1. **Golden Quadrilateral**
2. **North–South and East–West Corridors**

9. Road transport is important in India because:

1. It **provides door-to-door service**, making the movement of goods and people more convenient compared to other modes of transport.
2. It is **suitable for short and medium distances**, especially in rural and hilly areas where railways and airways are not easily accessible.

10. Give a reason for each of the following:

(i) **Northern plain is best suited for the development of Railways.**

- The Northern plain has a **flat terrain**, making it easier and cost-effective to lay railway tracks.
- It also has a **dense population**, which generates high demand for passenger and freight transport.

(ii) **Railways are managed completely by the Central Government.**

- Railways form a **national network**, so uniform standards, policies, and coordination across states are needed for efficient and consistent operation.

11. **Two situations where helicopter services may be used:**

1. **Inaccessible areas:** Helicopters are used to reach remote or difficult terrains such as interiors of Jammu & Kashmir, mountainous regions of Himachal Pradesh, Uttarakhand, and northeastern states.
2. **Special operations and support:** They assist ONGC for offshore installations, defense operations, and provide relief during natural disasters.

12. **Efficient transportation boosts trade, commerce and industry by facilitating the movement of goods and people, driving economic growth. It**

also enhances urbanrural connectivity, providing better access to markets, services and opportunities, fostering balanced regional development.

13. Airways is gaining popularity in India because it allows faster travel, making it suitable for long distances and time-sensitive journeys. It also provides better connectivity to remote and inaccessible areas, such as the northeastern states and hilly regions, where other modes of transport are less practical.

14. South Indian rivers are not ideal for inland water transport because they are mostly seasonal, have uneven flow, and many sections become dry or shallow during non-monsoon periods. Their rocky terrain and fast currents also make navigation difficult.

15. Water transport is cheaper for moving bulk goods over long distances as it consumes less fuel compared to road or rail transport.

Waterways have a low environmental impact, producing less pollution compared to other forms of transport like trucks or trains.

16. Roads offer door-to-door service and are the most affordable and safest form of transportation, connecting villages to urban centers. They play a crucial role in the economic development of the country and also serve as links between railway stations and ports.

17. Two advantages of using railways as means of transport:

Railways act as the primary and more economical mode of transportation for both goods and passengers.

Railways foster integration across regions, for example, connecting the eastern states with the west and the northern states with the south.

18. NSEW is helpful for India because it improves national connectivity by linking key regions and promotes balanced regional development by reducing disparities.

19. 1. Constructing roads necessitates a smaller capital outlay compared to building railway systems.

2. Roads can be developed at elevated altitudes and across a variety of

terrains, allowing for greater flexibility in placement.

3. The expenses associated with maintaining road networks are comparatively minimal.

20. The National Airline of India is Air India. It operates both domestic and international flights, serving as the country's flagship carrier.

21. Advantages of Helicopter:

1. It is the fastest and most comfortable mode of transport, connecting remote and far-flung areas of the country.
2. Helicopters are crucial during natural disasters, as they can airlift people and deliver food, medicines, and other essentials.

Disadvantage of Helicopter:

- Helicopter transport relies on petroleum, which is a non-renewable source of energy.

22. Advantages:

1. It is the fastest mode of transport.
2. It is useful during natural calamities for rescue and relief operations.

Disadvantage:

- Air transport is expensive.

23. 1. It connects backward areas with advanced regions, enabling better use of resources.

2. It supports industrialization and urbanization by facilitating the movement of goods and labor.
3. It helps alleviate scarcity during crises by distributing essential goods.
4. It minimizes the impact of natural disasters by ensuring quick delivery of aid and rescue operations.
5. It promotes cultural exchange and unity by enabling the movement of people and interaction between diverse communities.
