

Chapter

Cricket

1. Amit is a young cricketer selected for his school's team. However, he is unsure about the essential equipment he must carry for his safety and performance. Suggest any four important pieces of cricket equipment he should take for the match. **MAIN 2024**

2. Ravi is the captain of his team in a T20 match. He wins the toss and must decide whether to bat or field first. The pitch has cracks and is expected to become more difficult for batting as the match progresses. What should he choose and why? **SQP 2021**

3. During a match, the fielding team appeals for an LBW decision, but the on-field umpire is unsure. He refers it to the third umpire. What is the role of the third umpire in such situations ? **MAIN 2023**

4. A batsman gets out on the very first ball they face without scoring any runs. What is this type of dismissal called? **SQP 2022**

5. What do you understand by the term 'follow on'? **COMP 2021**

6. What is the importance of the '30yard circle' in a cricket match?
MAIN 2024

7. What is a Declaration in cricket? **SQP 2021**

8. Identify the following umpire signals and explain their meanings.
MAIN 2023

9. Identify the following umpire signals and explain their meanings.
SQP 2022

10. What is the rule of following in a five day test match? COMP 2021

11. Write down any three fielding positions on the on side in cricket.
COMP 2003

12. Write any three fielding positions of “offside”. MAIN 2021

13. State three instances when a ball is considered a ‘dead ball’. MAIN 2021

14. Discuss the role and responsibilities of the International Cricket Council (ICC) in the governance of cricket worldwide. MAIN 2024

15. Explain the following cricket terms in detail SQP 2021

- (i) Substitute
- (ii) Declaration
- (iii) No Ball
- (iv) Follow-On

16. During a cricket match, a bowler intentionally delivers a fast, full-length ball at the batter’s toes, making it difficult to play. What is this type of delivery called in cricket? MAIN 2024

17. A batsman plays a shot that appears to be caught by a fielder, but the ball actually bounced just before reaching the fielder. What is this situation called in cricket? SQP 2021

18. A bowler delivers a ball that reaches the batter at head height without bouncing on the pitch. This delivery is considered dangerous and illegal. What is this type of delivery called? MAIN 2023

Solution

1. Amit should carry the following essential cricket equipment:

- (i) Bat – A cricket bat suitable for his playing style and comfort.
- (ii) Helmet – Protects the head from fast deliveries and accidental impacts.
- (iii) Pads (Leg Guards) – Safeguard the legs from fast bowling or accidental hits.
- (iv) Gloves – Protect the hands and improve grip while batting.

2. Ravi should **bat first** because:

- (i) The pitch has cracks and will deteriorate, making batting harder later in the match.
- (ii) Setting a target early puts psychological pressure on the opposing team.
- (iii) His batsmen can take advantage of the better batting conditions at the start.

3. The **third umpire** in such situations:

- (i) Reviews video replays to see if the ball hit the batsman in line with the stumps.
- (ii) Uses ball-tracking technology to predict whether the ball would have hit the stumps.
- (iii) Communicates the final decision to the on-field umpire, who then signals the outcome.

4. This type of dismissal is called a “**Golden Duck**”. It occurs when a batsman gets out for **zero runs on the very first ball** they face.

5. **Follow On:** It is the option available to the team that batted first to make the opposing team bat again immediately if the opposition’s **first innings total is significantly lower** than the first team’s score, as per the rules of the match.

6. Importance of the 30-yard circle in cricket:

The 30-yard circle is a marked oval on the cricket field with a **radius of 30 yards (27.4 meters)** from the stumps, connected by parallel lines. Its significance includes:

1. **Fielding Restrictions:** Determines where fielders can be placed during powerplays in limited-overs matches.
2. **Infield vs Outfield:** Divides the field into the infield (inside the circle) and outfield (outside the circle).
3. **Tactical Impact:** Encourages attacking batting during powerplays and strategic field placements for the bowling team.

7. Declaration in Cricket:

A **declaration** occurs when the **captain of the batting team voluntarily closes the innings** before all batsmen are dismissed.

Purpose:

- To **create enough time** to bowl out the opposition and force a result in a time-limited match.
- It is a **strategic decision** based on the match situation.

8. (i) Out : One arm raised straight above the head.

(ii) Leg Bye : Umpire raises one knee and taps that knee with a hand.

(iii) No Ball : One arm held out horizontally.

9. (i) No Ball : One arm held out horizontally.

(ii) Dead Ball : The umpire crosses and uncrosses their wrists below their waist to signal that the ball is no longer in play.

(iii) Bye : The umpire raises one open hand above their head to signal that runs have been scored without the batsman hitting the ball.

10. Follow-On Rule in a Five-Day Test Match:

In a five-day Test match, the **follow-on rule** states that:

- If the team batting **first** gains a lead of **200 runs or more** after the first innings,
- They can **enforce the opposition to bat immediately** for their second innings, instead of the team batting first taking their second innings.

Purpose:

- To **apply pressure on the trailing team**.
- Increases the chances of forcing a **result** rather than a draw.

11. Three fielding positions on the on side are

- (i) Mid on
- (ii) Square leg
- (iii) Fine leg

12. Three fielding positions on the offside are

- (i) Mid off
- (ii) Cover
- (iii) Extra Cover

13. A ball is considered a **dead ball** in cricket when it is no longer in play. Three instances are:

The ball becomes dead when it reaches the boundary.

It becomes dead when the batsman is dismissed.

It also becomes dead when the umpire calls it dead due to injury, obstruction, or any interruption.

14. Here is your answer rewritten in **numbering-wise format** suitable for ICSE Physical Education:

1. Regulation of the Game:

The ICC is responsible for framing, updating, and enforcing the rules of cricket uniformly across all member nations.

2. Organizing International Tournaments:

It conducts major global events such as the ICC Cricket World Cup, ICC T20 World Cup, and Champions Trophy.

3. **Membership Management:**

The ICC oversees its full and associate member countries, providing financial support and monitoring adherence to cricket regulations.

4. **Promotion of Cricket:**

It works to expand the reach of cricket worldwide by encouraging participation, especially in developing cricket nations.

5. **Code of Conduct and Anti-Corruption:**

The ICC maintains the integrity of the sport through strict anti-corruption measures, disciplinary action, and the ICC Code of Conduct.

15. Here's the answer rewritten in a **numbered format** for ICSE Physical Education:

1. **Substitute** – A substitute is a player who temporarily replaces another player on the fielding side due to injury or other valid reasons. The substitute can perform fielding duties but is **not allowed to bat, bowl, or act as a wicketkeeper**.
2. **Declaration** – Declaration occurs when the captain voluntarily ends the team's innings **before all players are out**. This is done to give the opposition a chance to bat and to create an opportunity to win the game, often in **test matches**, based on strategic calculations.
3. **No Ball** – A no ball is a delivery that **violates the laws of cricket**. It may happen due to overstepping the crease, delivering the ball above waist height, or an illegal bowling action. The batting side receives **an extra run**, and the bowler must bowl **an additional delivery** in the over.
4. **Follow-On** – Follow-on is applied in a **test match** when the team batting second **trails the first team's score by more than 200 runs**. The team that batted first can enforce the follow-on, making the opposition bat again immediately after their first innings.

16. During a cricket match, a bowler delivering a fast, full-length ball aimed at the batter's toes is called a **"Yorker."** It is a difficult delivery to play because it lands near the batter's feet, making it hard to hit effectively.

17. This situation in cricket is called a “**Bump Ball.**” It occurs when the batsman plays a shot that seems to be caught by a fielder, but the ball actually bounces on the ground just before reaching the fielder.

18. This type of delivery in cricket is called a “**Beamer.**” It is considered illegal and dangerous because the ball reaches the batter at head height without bouncing, posing a high risk of injury.
